Lahore, Pakistan | +92 317-0428715 | mujtabanaveed13@gmail.com | linkedin.com/in/muhammad-mujtaba-dev | github.com/Mujtabawebdev

Full Stack Developer (MERN) with 1+ years of experience independently building and shipping production-ready web applications, backed by a strong foundation in Data Structures & Algorithms and Object-Oriented Programming. Proficient in React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL — with hands-on experience across REST API design, JWT authentication, real-time systems (Socket.io), and end-to-end deployment. Recently expanded into AI/LLM engineering, building Retrieval-Augmented Generation (RAG) pipelines with LangChain and Google Gemini, and skilled at integrating AI tools (Claude, ChatGPT, GitHub Copilot) to accelerate development — looking to contribute to a product-focused team as a full-stack engineer.

TECHNICAL SKILLS

Front-End: HTML5 | CSS3 | JavaScript (ES6+) | TypeScript | React.js | Next.js | Redux Toolkit | React Hooks | React Router | TanStack Query | Tailwind CSS | Bootstrap

Back-End: Node.js | Express.js | RESTful API Design | JWT Authentication | Bcrypt | Middleware | MVC Architecture | Redis

Databases: MongoDB | Mongoose ODM | PostgreSQL | Prisma ORM | MySQL

AI/LLM Engineering: RAG | LangChain | Hugging Face Transformers | Google Gemini | Prompt Engineering | Vector Embeddings | Semantic Search | pgvector

Tools: Git | GitHub | Docker | CI/CD | Vercel | Postman | Axios | Multer | Nodemailer | Cloudinary | Socket.io | pgAdmin | MongoDB Compass | VS Code

Practices: Agile/Scrum | Version Control (Git) | API Testing | Debugging | Code Reviews

EXPERIENCE

Full Stack Developer | Arzen Inc.

August 2026 – Present

- Developed and maintained full-stack web applications for real-world client projects, translating client requirements into production-ready features using React.js/Next.js on the front-end and Node.js/Express.js on the back-end
- Built and consumed RESTful APIs to deliver client-facing functionality, ensuring reliable data flow between front-end interfaces and MongoDB/PostgreSQL databases
- Collaborated directly with clients and senior engineers to scope features, resolve bugs, and ship updates on schedule, maintaining code quality through version control and code reviews
- Implemented responsive, cross-browser UI components and integrated authentication and third-party services to meet client-specific requirements

Full Stack Developer Intern | Seebiz Pvt Ltd

August 2025 – August 2026

- Designed and deployed production-grade RESTful APIs (Node.js, Express.js) with full CRUD, middleware validation, and MVC architecture — tested via Postman across 3+ real-world projects
- Built pixel-perfect, responsive React.js UIs with Tailwind CSS — integrated Axios for frontend-backend communication and JWT & Bcrypt authentication
- Optimized MongoDB and PostgreSQL schemas for performance — fine-tuned queries to ensure full-stack applications ran fast and at scale
- Exploring AI/LLM integration — learning RAG pipelines, LangChain, and prompt engineering to extend applications with intelligent, context-aware features

Junior Frontend Developer | Techwizard

August 2023 – September 2024

- Developed responsive, pixel-perfect front-end interfaces for e-commerce web applications using HTML5, CSS3, JavaScript (ES6+), and React.js, converting UI/UX designs into cross-browser compatible web pages
- Built reusable React.js components and optimized front-end performance to deliver production-ready, high-quality user experiences
- Collaborated with senior developers using Git for version control and code reviews

EDUCATION

Post ADP — Computer Science | University of Education

2025 – 2027

Relevant Courses: Web Development | Advanced Database Systems | Operating Systems | OOP Analysis and Design

ADP — Computer Science | University of the Punjab

2023 – 2025

Relevant Courses: Programming Fundamentals | OOP | Data Structures & Algorithms

PROJECTS

Pets Veta — Pet Care Marketplace & Vet Appointment System

Tech Stack: React.js, TypeScript, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma, JWT, Stripe, Cloudinary, LangChain, Google Gemini

- Architected a full-stack pet care marketplace — integrated e-commerce, vet appointment scheduling, AI chat, and admin analytics across 4 user roles
- Implemented JWT-based RBAC for multi-role access (owners, doctors, admins) with PostgreSQL + Prisma ORM, eliminating unauthorized access and improving query performance
- Integrated Stripe for secure payment checkout across marketplace orders and appointment bookings
- Built a Retrieval-Augmented Generation (RAG) pipeline for an AI-powered Pet Assistant using LangChain, Hugging Face Embeddings, PostgreSQL (pgvector), and Google Gemini — processed Markdown docs via chunking, embedding generation, vector search, and LLM-based response generation

Instagram Clone — Social Media Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Bcrypt, Socket.io, Multer, Cloudinary

- Developed a feature-complete social media clone — user authentication, post creation, likes, comments, and follow system, extended with Socket.io real-time notifications and Cloudinary + Multer media uploads
- Designed secure RESTful APIs with JWT authentication and Bcrypt password hashing, structuring MongoDB schemas for efficient querying of posts, comments, and user relationships

Student & Teacher Management System

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Bcrypt, Nodemailer, Socket.io

- Centralized academic record-keeping into a full-stack system — JWT authentication, Bcrypt password hashing, Nodemailer automated email alerts, and Socket.io real-time updates, reducing manual admin overhead
- Designed role-based dashboards for students and teachers with React.js and Express.js REST APIs, streamlining record access and communication workflows

CERTIFICATIONS

Web Development Certification — Bano Qabil, Lahore, 2025

Web Development Trainee — Qalam Training Program

SOFT SKILLS

Problem Solving | Team Collaboration | Quick Learner | Critical Thinking | Strong Communication | Time Management
